

Homework

Introduction To Java

1.

```
// The "Testing" class.  
import java.awt.*;  
  
public class Testing  
{  
    public static void main (String[] args)  
    {  
        /* output line */  
        System.out.println("Testing");  
    } // main method  
} // Testing class
```

Consider the code above,

- a. What is the name of the class?
Testing
 - b. What is the name of the source code file?
Testing.java
 - c. What is the name of the class file?
Testing.class
 - e. Mark the beginning and the end of the class.
 - f. Mark the beginning and the end of the main method.
 - g. Mark the line of comment.
 - h. What is the name of the packages that are imported?
java.awt
 - i. What does the program do?
Print the string "Testing"
2. **Output1.java** Write a program that output your name and your address on separate lines.
